Vulnerability Details

This vulnerability allows remote attackers to execute arbitrary code on affected installations of Orchestra C1 CMS. Authentication is required to exploit this vulnerability.

The specific flaw exists within Composite.dll. The issue results from the lack of proper validation of user-supplied data, which can result in deserialization of untrusted data. An attacker can leverage this vulnerability to execute code in the context of the service account.

Additional Details

Orchestra has issued an update to correct this vulnerability. More details can be found at: <https://github.com/Orchestra/C1-CMS-Foundation/releases/tag/v6.11>
