Affected Products

SharePoint

Vulnerability Details

This vulnerability allows remote attackers to execute arbitrary code on affected installations of Microsoft SharePoint. Authentication is not required to exploit this

vulnerability.

The specific flaw exists within the SessionSecurityTokenHandler class. The issue results from the lack of proper validation of user-supplied data, which can result in deserialization of untrusted data. An attacker can leverage this in conjunction with other vulnerabilities to execute code in the context of the service account.

Additional Details

Microsoft has issued an update to correct this vulnerability. More details can be found at: <https://msrc.microsoft.com/update-guide/en-US/vulnerability/CVE-2026-50522>

Disclosure Timeline

- **2026-05-21** - Vulnerability reported to vendor
- **2026-07-15** - Coordinated public release of advisory
- **2026-07-15 ** - Advisory Updated
