# BinaryServerFormatterSink.TypeFilterLevel Property

## Definition

Namespace: [System.Runtime.Remoting.Channels](#) Assembly: System.Runtime.Remoting.dll

Important

Some information relates to prerelease product that may be substantially modified before it's released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

Gets or sets the `TypeFilterLevel` value of automatic deserialization that the `BinaryServerFormatterSink` performs.

```
public:
    property System::Runtime::Serialization::Formatters::TypeFilterLevel TypeFilterLevel {
        System::Runtime::Serialization::Formatters::TypeFilterLevel get(); void
        set(System::Runtime::Serialization::Formatters::TypeFilterLevel value); };
```

```
[System.Runtime.InteropServices.ComVisible(false)]
public System.Runtime.Serialization.Formatters.TypeFilterLevel TypeFilterLevel { get;
set; }
```

```
[<System.Runtime.InteropServices.ComVisible(false)>]
member this.TypeFilterLevel : System.Runtime.Serialization.Formatters.TypeFilterLevel
with get, set
```

```
Public Property TypeFilterLevel As TypeFilterLevel
```

## Property Value

### TypeFilterLevel

The `TypeFilterLevel` that represents the current automatic deserialization level.

Attributes

[ComVisibleAttribute](#)

## Remarks

Supported values are `Low` (the default) and `Full`. For details about deserialization levels, see [Automatic Deserialization in .NET Remoting](#).
