HttpStaticObjectsCollection.Deserialize(BinaryReader) Method

Definition

Namespace: [System.Web](#) Assembly: System.Web.dll

Important

Some information relates to prerelease product that may be substantially modified before it's released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

Creates an [HttpStaticObjectsCollection](#) object from a binary file that was written by using the [Serialize\(BinaryWriter\)](#) method.

```
public:  
    static System::Web::HttpStaticObjectsCollection ^ Deserialize(System::IO::BinaryReader ^  
reader);
```

```
public static System.Web.HttpStaticObjectsCollection Deserialize(System.IO.BinaryReader  
reader);
```

```
static member Deserialize : System.IO.BinaryReader ->  
System.Web.HttpStaticObjectsCollection
```

```
Public Shared Function Deserialize (reader As BinaryReader) As  
HttpStaticObjectsCollection
```

Parameters

reader [BinaryReader](#)

The [BinaryReader](#) used to read the serialized collection from a stream or encoded string.

Returns

[HttpStaticObjectsCollection](#)

An [HttpStaticObjectsCollection](#) populated with the contents from a binary file written using the [Serialize\(BinaryWriter\)](#) method.

Remarks

Important

Calling this method with untrusted data is a security risk. Call this method only with trusted data. For more information, see [Validate All Inputs](#).

The [Deserialize](#) method is used to read the contents of a [HttpStaticObjectsCollection](#) object that is stored in a storage location that is created by the [Serialize](#) method. To serialize an [HttpStaticObjectsCollection](#), use the [Serialize](#) method.
