Telerik Web Forms Allows JavaScriptSerializer Deserialization - Telerik UI for ASP.NET AJAX
New to Telerik UI for ASP.NET AJAX ? [Start a free 30-day trial](#)

[Allows JavaScriptSerializer Deserialization]()

Updated over 1 year ago

[Problem]()

Exploiting .NET JavaScriptSerializer Deserialization ([CVE-2019-18935](#)) issue through RadAsyncUpload can lead to executing malicious code on the server in the context of the w3wp.exe process.

[Prerequisites for an Attack]()

-

An attacker can break the RadAsyncUpload encryption (or have prior knowledge of your custom encryption keys) and stage a malicious request.

-

The type whitelisting feature of RadAsyncUpload is not enabled (see [AllowedCustomMetaDataTypes appSettings key](#)).

[Solution]()

To make sure you are not vulnerable we recommend that you upgrade to R1 2020 or later as shown in the diagram below:

For more information, please check the table below and apply the recommendations to fully secure the version of Telerik.Web.UI.dll used in your projects:

| Telerik.Web.UI.dll versions | **An attacker is able to break the RadAsyncUpload encryption and stage a malicious request | The type whitelisting feature of RadAsyncUpload is not enabled | Recommendation | | Q1 2011 (2011.1.315) to R2 2017 SP1 (2017.2.621) | Possible | This feature is not available | [Upgrade](#) to R3 2019 SP1 or later and apply the [recommended security settings](#). | | **R2 2017 SP2 (2017.2.711) to R3 2019 (2019.3.917) | Not possible through RadAsyncUpload, unless the attacker has access to your encryption keys | This feature is not available | [Upgrade](#) to R3 2019 SP1 or later and apply the [recommended security settings](#). | | **R3 2019 SP1 (2019.3.1023) | Not possible through RadAsyncUpload, unless the attacker has access to your encryption keys | The feature is opt-in | Apply the [recommended security settings](#). | | **R1 2020 (2020.1.114) and later | Not possible through RadAsyncUpload, unless the********

attacker has access to your encryption keys | The feature is enabled by default | Apply the [recommended security settings](#). | |

[How to Obtain R1 2020 or Later?]()

If you have an active license go to the [Downloads section](#), look for version 2020.1.114 or later in the Version dropdown and download the Telerik_UI_for_ASP.NET_AJAX_2020_1_114_Dev_hotfix.zip archive. You can see how to update your project [here](#). For any questions, you can contact us via the [support ticketing system](#).

If you don't have an active license, you can reach out the Telerik support by opening a [General Feedback](#) ticket.

[Notes]()

We would like to thank Markus Wulftange of [Code White GmbH](#) and Paul Taylor ([@bao7uo](#)) for assisting with making the information public.
